An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Luis A. Carrion (Reg. No. 61,255) on 8/26/2010.

The application has been amended as follows:

Claim 4, line 17: "a forth" has been deleted and replaced by --a fourth--

Claim 12, line 4: "body." has been deleted and replaced by --body,--

Claim 13, line 7: "second step." has been deleted and replaced by --second step,--

Claim 14, line 1: "claim 4." has been deleted and replaced by --claim 4,--

Claim 16, line 2: "steps of;" has been deleted and replaced by --steps of:--

Allowable Subject Matter

Claims 4-16 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not fairly describe, teach, or suggest a method for driving a robot, in its entirety, particularly comprising: a first step of providing a moving

object, corresponding to the robot, a plurality of sensors for detecting the movement of the moving object and an operation command generating device for generating the operation command based on output from the plurality of sensors and storing a pre-arranged operation command of the operation command generated based on the output from the plurality of sensors while the moving object performs a same movement as a predetermined movement; a second step for obtaining an operational image data being obtained in time series while the moving object or imitation thereof is moved in a desired motion; a third step for storing the image data and the pre-arranged operation command, the image data being associated with the pre-arranged operation command; a fourth step of obtaining an operational image data of the moving object or imitation thereof; and a fifth step for specifying an image data corresponding to the operational image data and providing the pre-arranged operation command corresponding to the specified image data to the robot as the operation command.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
